

# Wireless Camera

Model BC-16

**Amiko Home** presents completely wireless camera with mobile application. Electrical installation is not required, wifi is used for data transmission. The camera can be operated by normal or rechargeable batteries, making this camera truly wireless. If you do not wish to bother about changing or charging the batteries every 4-6 months, please use our solar panel with integrated battery, for carefree operation. Record on the TF Card inside the camera, upload to cloud storage or mobile, depending on the user preferences
