European Union Directive on Waste Electrical and Electronic Equipment (WEEE)

This symbol applies to European countries only and indicates that the equipment carrying this mark must NOT be thrown into trash. At the end of its useful life, always dispose of E-waste in a manner which is consistent with local laws and regulations. For more information on the EU WEEE Directive, please see http://ec.europa.eu/environment/waste/weee_index.htm

1. SAFETY

This HD Receiver has been manufactured to satisfy the international safety standards. Please read the following safety precautions carefully.

MAINS SUPPLY: 100~240V AC, 50/60Hz

OVERLOADING: Do not overload wall outlet, extension cord or adapter as this may result in fire or electric shock.

LIQUIDS: Keep liquids away from the HD Receiver. The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

CLEANING: Disconnect the HD Receiver from the wall outlet before cleaning. Use a light damp cloth (no solvents) to dust the HD Receiver.

VENTILATION: The slots on top of the HD Receiver must be left uncovered to allow proper airflow to the unit. Do not stand the HD Receiver on soft furnishings or carpets. Do not expose the HD Receiver to direct sunlight or do not place it near a heater. Do not stack electronic equipments on top of the HD Receiver.

ATTACHMENTS: Do not use any attachments that are not recommended as these may cause hazard or damage the HD Receiver.

CONNECTION TO THE SATELLITE DISH LNB: Disconnect the HD Receiver from the mains before connecting or disconnecting the cable from the satellite dish.

FAILURE TO DO SO CAN DAMAGE THE LNB.

CONNECTION TO THE TV: Disconnect the HD Receiver from the mains before connecting or disconnecting the cable from the satellite dish.

FAILURE TO DO SO CAN DAMAGE THE TV.

EARTHING: The LNB cable MUST BE EARTHED to the system earth for the satellite dish.

LOCATION: Place the HD Receiver indoor in order not to expose to lightening, rain or sunlight.

2. INTRODUCTION

Thank you for purchasing the HD Receiver.

This HD Receiver is fully compliant with the international DVB standard and thus transmits digital images, sounds, information guides and teletext directly to your TV through the satellite broadcasting.

Now you can comfortably see and receive digitally transmitted music, news, movie and sports satellite broadcasts in your office or at your home. You can enjoy interesting games embedded in HD Receiver.

In service search section, both the automatic service search method and the manual search mode are provided. Also it supports DiSEqC 1.0, 1.2 and USALS, enabling you to move your antenna in order to focus preferred satellite. You can save up to 6000 TV and Radio services and work around with the favorite, Lock, Delete, Move and Sort functions.

The menu is very modern and supports multiple languages. All functions can be carried out using the remote control and some of the functions can also be carried out using the front panel. The HD Receiver is easy to use and adaptable for future advances. Please be aware that new software may change the functions of the HD Receiver.

If you have any difficulties concerning the operation of your HD Receiver, please refer to the relevant section of this manual, including the 'Troubleshooting'. This Manual will provide you with useful information on using the HD Receiver.

3. FEATURES

- MPEG-Fully DVB-S / DVB-S2 (H.264) HD compliant
- 6000 channels (TV and Radio) programmable
- Multilingual menu text support
- Channel switching time less than 1 second
- Channel list editing
- Favorite channel list editing
- True-color On-Screen Display (OSD)
- Full Picture In Graphic (PIG) function
- Electronic Program Guide (EPG) for on screen channel information
- Subtitle supported
- Teletext supported by VBI insertion and software emulation
- Parental lock facility by channel and program event
- Program and Channel information transfer from receiver to receiver
- Exciting games embedded
- Dolby Digital Bit-Stream output via HD OUT
- DiSEqC 1.0, 1.1, 1.2, USALS and Unicable
- Full HD (1080p) Video/Audio Output
- 2x USB 2.0 Host
- RTC (Real-Time-Clock)
- Time Shift
- Video Recording
- Recording one channel and Time Shifting another channel (optional)
- 3G Network Function Supported

4. REMOTE CONTROL

(AMIKO HD8140C SE / HD8142 / HD8155 / HD8265+ / MINI HD265 / MINI COMBO EXTRA / MIRA WIFI / IMPULSE T2C)

You can power on/off the receiver, operate on screen menu, and use a variety of hot key function.

POWER To switch your receiver on from standby or standby to on.

MUTE Used to enable or disable the audio

NUMERIC KEYS Used to select channels or enter programming parameters

TV / RADIO Receiver switches between TV and Radio mode.

(ZOOM) Press key select zoom times, from X1 to X16.

RECALL Return to the previous menu or status.

TV/SAT Receiver switches between TV and receive mode.

INFO To display channel status or various program information of current service.

EPG (Electronic Program Guide) Display the Programs guide on screen when available.

MENU Displays the Main Menu on the screen, or return to the previous menu or status.

EXIT Cancel the user selection and return to the viewing mode from a menu.

OK To select menu option, or to updated on entry.

◀/▶ KEY To adjust volume level, or to move cursor left or right in the menu.

▼/▲ KEY To change channels, or to move cursor up or down in the menu.

PAGE ▶ /PAGE ▶ To move up the cursor to the next or previous page in the menu or channel list.

● REC Has different functions per menu.

Teletext Shows teletext information of the current channel supports.

Subtitle Subtitle Display.

UHF In case your TV is connected through RF Modulator (UHF), select output channel number between CH21 and CH69 with up and down key.

(FIND) Use to prompt find channels sort by character.

⌚ TIMER Press timer key you can setup up the Standby time.

V.FORMAT Press V.FORMAT button to switch the display mode among „AUTO“, „By Native TV“, „480p“, „576P“, „720P_50“, „720P_60“, „1080i_50“, „1080i_60“, „1080P_50“ and „1080P_60“

FAV (FAVORITE) To set receiver to the favorite server mode, display the favorite channel.

FOLDER Press this button to enter the Record Manager menu directly.

AUDIO (Red Key) Audio channels setup, to select audio mode; Left, Right, Stereo, Mono.

OPTION (GREEN KEY) Shows NVOD information of the current channel supports.

SAT Display the satellite list at normal picture.

Play Mode Select the play mode in MP3 or JPEG player.

USB To remove the USB Hard Disk safely.

TMS (Time Shift) Press this button to display Time Shift info bar.

▶ Play To play the MP3, JPEG, or Record files.

■ Stop To stop the Time Shift, recording, or MP3/JPEG player.

⏸ PAUSE Used to select the freeze function. Press once to freeze the screen picture.

⏮ FB To start Fast Backward function.

⏭ FF To start Fast Forward function.

⏮ SB To start Slow Backward function.

⏭ SF To start Slow Forward function

⏮/⏭ PREV/NEXT Switch to preview or next file in play mode

(AMIKO T60 / T70)

⏻ POWER To switch your receiver on from standby or standby to on.

🔇 MUTE Used to enable or disable the audio

NUMERIC KEYS Used to select channels or enter programming parameters

TV / RADIO Receiver switches between TV and Radio mode.

(ZOOM) Press key select zoom times, from X1 to X16.

(RECALL) Return to the previous menu or status.

(AUDIO) Audio channels setup, to select audio mode; Left, Right, Stereo, Mono.

INFO To display channel status or various programme information of current service.

EPG (Electronic Programme Guide) Display the Programmes guide on screen when available.

MENU Displays the Main Menu on the screen, or return to the previous menu or status.

EXIT Cancel the user selection and return to the viewing mode from a menu.

OK To select menu option, or to updated on entry.

VOL-, VOL+ KEY To adjust volume level, or to move cursor left or right in the menu.

CH-, CH+ KEY To change channels, or to move cursor up or down in the menu.

PAGE+/PAGE- To move up the cursor to the next or previous page in the menu or channel list.

Red Key Has different functions per menu.

TTX (GREEN KEY) Shows teletext information of the current channel supports.

SUBTITLE (YELLOW KEY) Subtitle Display.

🔍 (FIND) Use to prompt find channels sort by character.

FAV (FAVOURITE) To set receiver to the favourite server mode, display the favourite channel.

📁 Archive Press this button to enter the File Manager menu directly.

▶ **Play** To play the MP3, JPEG or recording file, or start timeshift function.

■ **Stop** To stop MP3/JPEG player, recording file, Time Shift, or playback.

● **Record** To start recording.

◀◀ **Fast Backward** To start Fast Backward function.

▶▶ **Fast Forward** To start Fast Forward function.

V.FORMAT Press V.FORMAT button to switch the display mode among „Auto-> by native TV->1080i->1080p etc.

TV/STB Receiver switches between TV and receive mode.

AMIKO HD8140C SE

STANDBY KEY: To switch the receiver power on/stand by.

MENU KEY: To enter the Main Menu.

OK KEY: To see TV/Radio channel list, or to confirm in the menu.

V-/V+ KEY: To adjust volume level, or to move cursor left or right in the menu.

CH-/CH+ KEY: To change channels, or to move cursor up or down in the menu.

POWER Indicator: Lit whilst the receiver is powered on and at standby mode.

Signal Indicator: When received signal is strong, the signal indicator is lit.

Card Slot: One CA Interface for Conax.

Display: (LED type) Indicates operating status of receiver.

AMIKO HD8142

Remote Sensor: Detects infrared signal from remote control unit.

POWER Indicator: Lit whilst the receiver is powered on and at standby mode.

Signal Indicator: When received signal is strong, the signal indicator is lit.

USB: USB 2.0 Host, connect to USB hard disk, flash disk, WiFi dongle, 3G dongle. (On the right side of the receiver)

Display: (LED type) Indicates operating status of receiver.

POWER KEY: To switch the receiver power on/stand by.

CH-/CH+ KEY: To change channels, or to move cursor up or down in the menu.

Card Slot: One slot CA Interface for Conax Smartcard (on left side).

AMIKO HD8155

POWER KEY: To switch the receiver power on/stand by.

MENU KEY: To enter the Main Menu.

OK KEY: To see TV/Radio channel list, or to confirm in the menu.

V-/V+ KEY: To adjust volume level, or to move cursor left or right in the menu.

CH-/CH+ KEY: To change channels, or to move cursor up or down in the menu.

Remote Sensor: Detects infrared signal from remote control unit.

POWER Indicator: Lit whilst the receiver is powered on and at standby mode.

Signal Indicator: When received signal is strong, the signal indicator is lit.

Card Slot: One CA Interface for Conax.

USB A: USB 2.0 Host, connect to USB hard disk, or flash disk, and 3G dongles.

Display: (LED type) Indicates operating status of receiver.

AMIKO HD8265+

POWER KEY: To switch the receiver power on/stand by.

MENU KEY: To enter the Main Menu.

OK KEY: To see TV/Radio channel list, or to confirm in the menu.

LEFT/RIGHT KEY: To adjust volume level, or to move cursor left or right in the menu.

UP/DOWN KEY: To change channels, or to move cursor up or down in the menu.

Remote Sensor: Detects infrared signal from remote control unit.

POWER Indicator: Lit whilst the receiver is powered on and at standby mode.
Signal Indicator: When received signal is strong, the signal indicator is lit.
Card Slot: One CA Interface for Conax.
Common Interface: One socket for Conditional Access Modules CAM.
USB A: USB 2.0 Host, connect to USB hard disk, or flash disk, and 3G dongles.
Display: (LED type) Indicates operating status of receiver.

AMIKO MINI HD265

Remote Sensor: Detects infrared signal from remote control unit.
POWER Indicator: Lit whilst the receiver is powered on and at standby mode.
Signal Indicator: When received signal is strong, the signal indicator is lit.
Card Slot: One CA Interface for Conax.
USB (on the side): USB 2.0 Host, connect to USB hard disk, or flash disk, and 3G dongles.
Display: (LED type) Indicates operating status of receiver.
RS 232 (on the side): This is used to connect your receiver to a computer through a serial cable.
IR IN (on the side): Connect an External IR-Sensor (Infrared).

AMIKO MINI COMBO EXTRA

Remote Sensor: Detects infrared signal from remote control unit.
POWER Indicator: Lit whilst the receiver is powered on and at standby mode.
Signal Indicator: When received signal is strong, the signal indicator is lit.
Card Slot: One CA Interface for Conax.
USB (On the side): USB 2.0 Host, connect to USB hard disk, or flash disk, and 3G dongles.
Display: (LED type) Indicates operating status of receiver.

AMIKO MIRA WIFI

Remote Sensor: Detects infrared signal from remote control unit.
POWER Indicator: Lit whilst the receiver is powered on and at standby mode.
Signal Indicator: When received signal is strong, the signal indicator is lit.
Card Slot: One CA Interface for Conax.
USB (On the side): USB 2.0 Host, connect to USB hard disk, or flash disk, and 3G dongles.
Display: (LED type) Indicates operating status of receiver.

AMIKO IMPULSE T2C

Remote Sensor: Detects infrared signal from remote control unit.

POWER Indicator: Lit whilst the receiver is powered on and at standby mode.

Signal Indicator: When received signal is strong, the signal indicator is lit.

Card Slot: One CA Interface for Conax. Under the receiver.

USB: USB 2.0 Host, connect to USB hard disk, or flash disk (on the right side of the receiver).

Display: (LED type) Indicates operating status of receiver.

AMIKO T60

Remote Sensor: Detects infrared signal from remote control unit.

POWER Indicator: Lit whilst the receiver is powered on and at standby mode.

Signal Indicator: When received signal is strong, the signal indicator is lit.

USB: USB 2.0 Host, connect to USB hard disk, or flash disk (on the right side of the receiver).

Display: (LED type) Indicates operating status of receiver

Buttons: (Standby, CH-, CH+, V-, V+) to operator the receiver.

AMIKO T70

Remote Sensor: Detects infrared signal from remote control unit.

POWER Indicator: Lit whilst the receiver is powered on and at standby mode.

Signal Indicator: When received signal is strong, the signal indicator is lit.

USB: USB 2.0 Host, connect to USB hard disk, or flash disk (on the right side of the receiver).

Display: (LED type) Indicates operating status of receiver

Buttons: (Standby, CH-, CH+) to operator the receiver.

RF IN: This port is to connect the coaxial cable from Terrestrial/CableAntenna.

7. CONNECTING YOUR SYSTEM

There are two ways to connect the receiver to your existing TV system. We recommend using one of the following cases for the best result:

1. If you have a high definition television set, you should use a HDMI cable for best result. Plug one end of the cable into the HD OUT socket on the receiver, and the other end into the matching socket on your television. In this case, you do not have to make audio connections because the HDMI connector can output stereo audio or Dolby Digital audio.
2. Connect one end of RCA cable to the RCA jack on the back of the receiver and the other end to a RCA jack on your TV.

8. BASIC OPERATIONS

8.1 TURN ON STB

First, open the power switch to turn on the unit. When the STB is first used, there will play the first channel from the default Channel List. If the STB is not first used, STB will play the same channel as last time before turning off.

8.2 POWER

1. Press [Power] Key can enter the Standby state
2. In Standby state, press [Power] Key again can call back the unit and go on play the previous channel
3. User can also disconnect the device's main power to end the Standby state.

8.3 MUTE

1. Press [MUTE] key to mute the sound and the screen will show up mute OSD.
2. Press [MUTE] key again to restore sound.

8.4 PAUSE

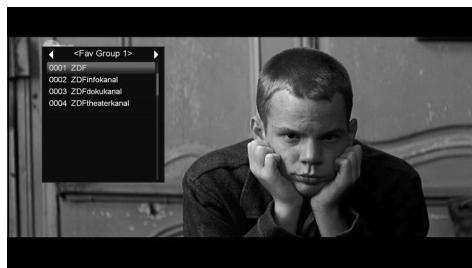

1. In playing mode, press [Pause] key, the picture will be paused, but the sound of the channel will still continues.
2. Press [Pause] key again, the screen's picture will skip over to the current playing picture, and the sound of the channel will corresponding playing.

8.5 RECALL

Press [RETURN] key will directly switch to the previous channel that you played before current channel.

8.6 FAVORITE

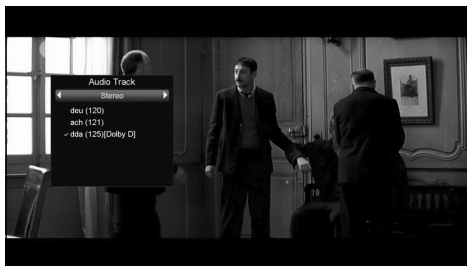

1. In full screen, press [FAV] key, it will display a window of "Favorite list" on the left of the screen, which you can watch like below.

2. In the window of "Favorite list", you can move highlight by press [Channel Up/Channel Down] key to select favorite Channels.
3. In the window of "Favorite list", you can press [Left/Right] key to select favorite groups Pressing [P-/P+] keys can implement the "Page up/Page down" function
4. Press [Exit] key to exit the current window.

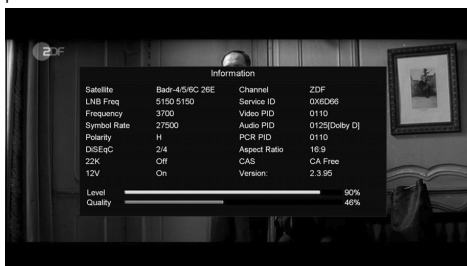

8.7 AUDIO

1. In full screen, press [AUDIO] key can open the "Audio" window on the screen.
2. You can modify the audio track by press [Channel Up / Channel Down] key and modify the audio mode by press [left/ right] key.
3. Mode: Left/Right/Stereo/Mono

8.8 INFORMATION

In full screen, press [INFO] key (press [INFO] key and [RED] key) can open information screen, in the window shows the parameters of current channel.

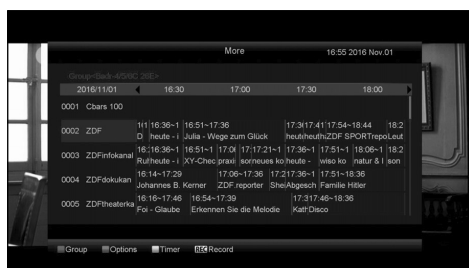

8.9 EPG

1. The STB has an Electronic Program Guide (EPG) to help you navigate channels through all the possible viewing options. The EPG supplies information such as channel listings and starting and ending times for all available channels. Press [EPG] key to display EPG screen.

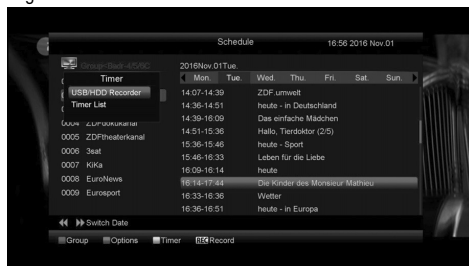

2. Press [Red] key can select the channels by different group, such as by Favorite/Satellite/Provider/CAS etc.
3. Press [Green] key to select different display mode among Now EPG, Next EPG, More and Schedule, like the following picture:

4. Press [Yellow] key in EPG menu can set one record timer or go to Timer List menu.

5. In EPG menu, when you select one event by high light item, you can set this event to record timer list directly by press [REC] button.
6. In EPG menu, press [Exit] to close EPG screen.

8.10 TV/RADIO

In TV mode, pressing [TV/RADIO] key can switch to Radio mode. In Radio mode, press [TV/RADIO] key to switch to TV mode.

8.11 CHANNEL LIST

1. In full screen, press [OK] key can enter "Channel List".

2. Press [Red] key to change the different group. Which you can watch like below.

3. Press [Green] key to display details information for EPG Now.

4. Press [Yellow] key you can change the current channel's property, such as FAV/ Lock/ Skip/ Delete/ Rename.

5. Press [Blue] key can open the "Sort" window like below. There are five kinds of sorting ways. You can press [Channel Up/Channel Down] key to move highlight and press [OK] key to confirm your selection.

6. The five kinds of sorting way are:
- Default: Sorting by scanning result.
 - FTA/\$: Sort channel through free and scramble sequence. Free channel will in the front of channel list and scramble channel will at the rear of channel list

- Lock: Accumulated all locked channels and list in the last of TV Channel List.
 - Name (A-Z): Sorting in Alphabetical Order, ignore "\$" symbol.
 - Name (Z-A): Sorting in Alphabetical Order, ignore "\$" Symbol.
7. Press [Up/Down] key to move highlight and press [OK] key to play the highlighted channel.
 8. Press [Page Up/Page Down] key to page up and page Down.
 9. Press [Exit] key to exit the channel list.

8.12 SLEEP

1. This function can set sleep timer. When you set a sleep timer and the time arrive, the system will enter to standby automatically.
2. Pressing [SLEEP] key, it will switch the mode between Sleep Timer Off/10/30/60/90/120 minutes.

8.13 PAGE UP/PAGE DOWN

In Channel list, press [Page+/Page-] key can page up and page down the channel list.

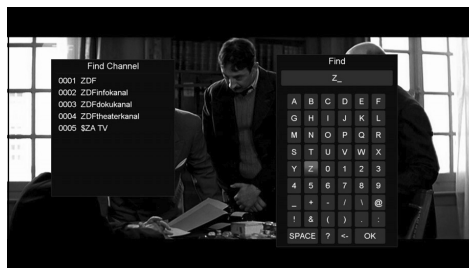

8.14 TEXT

1. Press [TTX] key in full screen, you can open teletext page on the channel which has teletext information.

2. Press [White] key into the blind scanning immediately.

TP Scan

Press [Green] key to scan current TP's programs.

Auto DiSEqC

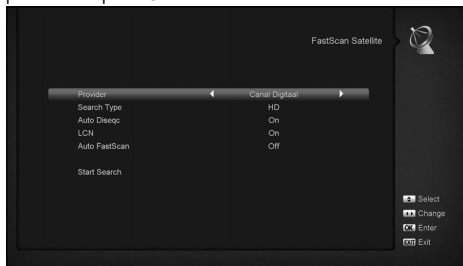

Press [Blue] key to run Auto DiSEqC function, it can find the satellite connect to which port automatically.

Blind Scan

Press [White] key can directly into blind scan mode to scan the current satellite.

10.2 FASTSCAN SATELLITE

In this menu, you can search the channels fast by select the provider and press OK button on Start Search item.

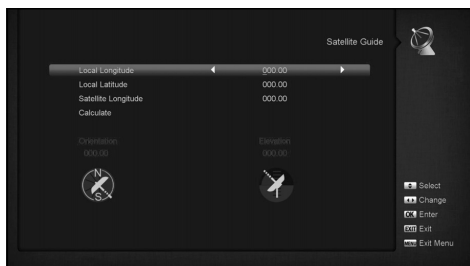

10.3 AUTO INSTALLATION

"Auto Installation" is a very new and convenient function. It will automatically detect all dishes connecting to this machine and scan the available services belonging to the satellite matched according to satellites and transponders data in current database. You don't have to input any parameter of your antenna settings. Just press " OK " button to enter this "Auto Installation" menu then it starts scanning and shows you the result at the end of scanning.

10.4 SATELLITE GUIDE

When you enter to "Satellite Guide" menu, you will see the screen like below:

"Satellite Guide" is used for user to enter local longitude; local latitude and satellite longitude. By the evaluation from the receiver, the user can evaluate the antenna azimuth and antenna elevation; the user can follow this guidance to adjust the antenna.

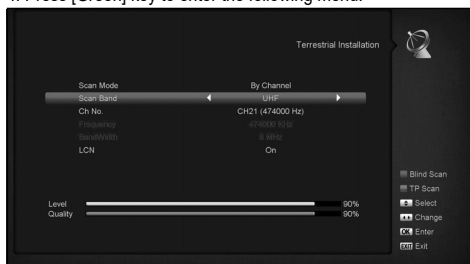

1. You can use number keys to input parameters in "Local Longitude", "Local Latitude" and "Satellite Longitude".
2. You can use [Left/Right] key to select east or west in "Local Longitude" and "Satellite Longitude", select north and south in "Local Latitude".
3. Moving highlight to "Start" item and press [OK] key. The lower column on the screen will calculate the corresponding value automatically.
4. Orientation means the angle between south and satellite.
5. Press [Exit] key to draw back to "Main" Menu.

10.5 TERRESTRIAL INSTALLATION

Press [OK] key to enter the selected item.

1. You can select the Bandwidth according to different countries.
2. You can set the Tuner Power ON/OFF.
3. Press [Red] key to directly enter blind scan mode to scan the current programs.
4. Press [Green] key to enter the following menu.

Scan Mode

1. There are two modes. You can scan channel by channel or by frequency.
2. When scan band is UHF and region is "France", the range of Ch No. is from 21 to 69. When scan

3. band is VHF and region is "France", the range of Ch No. is from 1 to 9. (it's according to region)
4. Press [Red] key to enter blind scan menu, or press [Green] key to enter TP scan menu.
5. Press [Exit] key to exit the scanning.

10.6 CABLE INSTALLATION

Press [OK] key to enter the selected item.

1. You can select the Scan Mode, Manual Scan or Blind Scan.
2. You can input the Frequency by using the numeric buttons of the RCU.
3. You can input the Second Frequency by using the numeric buttons of the RCU, if you set the Scan Mode to Blind Scan.
4. You can input the Symbol Rate by using the numeric buttons of the RCU.
5. You can select the QAM value among 16QAM, 32QAM, 64QAM, 128QAM and 256QAM.
6. You can turn ON or OFF the NIT Search, if you set the Scan Mode to Manual Scan.
7. When you complete your modification, press OK button on Search item to enter Scan menu and then.
8. Press OK button, it will begin to scan.

When connected to the Internet, receiver can manually or automatically make software update from file from server.

Note: This function depends on connection with external server. In case of no software on server, this function will not work.

11.8.3 Ftp Upgrade

When connected to the Internet, receiver can make software update from file from FTP server.

Note: This function depends on connection with external server. In case of no software on server, this function will not work.

11.8.4 Upgrade by RS232:

1. We offer the functions for user to connecting receiver (Master) to the other receiver (Slave) via serial interface. Connect master receiver to slave receiver via serial interface. Enter "Software Upgrade" menu in master receiver and press [left/right] keys to switch upgrade mode ☐ All SW+bootloader /All SW+Channel list/Software(no channel list)/Channel list.
2. Moving highlight to "Start" on master receiver and press [OK] key to start upgrade.
3. Turn on slave receiver and it needn't operate any setting.
4. Press [Exit] key to draw back.

11.8.5 Backup to USB

In this menu ,you can dump the software to the USB equipment

1. In "Backup file",you can press [OK] key to edit the file name.; Press "Left/Right" button select USB A or USB B;
2. In "Backup to USB", you can press [OK] to start backup software.

a) Upgrade By Satellite:

This function can upgrade the software through signal lines from the satellite

1. Select the satellite and TP or input the TP value and download PID, these parameters you can get from your provider.
2. Then move the highlight to the start button and press [OK] button to start upgrade.

b) Upgrade By Terrestrial:

This function can upgrade the software through signal lines from the Terrestrial

1. Select or input the Frequency, Bandwidth and download PID, these parameters you can get from your provider.
2. Then move the highlight to the start button and press [OK] button to start upgrade.

c) Upgrade by Cable

This function can upgrade the software through signal lines from the cable.

1. Input the frequency, symbol rate value and download PID, and select scan mode.
2. Then move the highlight to the start button and
3. press [OK] key to begin to upgrade.

11.9 DEFAULT SETTING

11.9.1 Default Value

When you press [OK] key in the "Default Setting" item:

1. There will pop a dialogue for you to enter the password, and the default password is "0000".
